Right-Wing JFK Slaying Plot Alleged

A spokesman for Virginia Rep. Thomas Downing says the congressman has evidence that suggests anti-Castro Cuban exiles assassinated President John F. Kennedy because of the failure of the 1961 Bay of Pigs invasion of Cuba.

Downing, who has been campaigning for more than a year to have the House create a select committee to investigate the assassination, will release the information at a news conference tomorrow.

Downing's spokesman said that the information is "startling" and "disturbing."
